中文

Here are some templates created for C++ novices to smoothly learn C++ without any programming experience.

Please choose the one that suits you:

- For novices who use *Programming: Principles and Practice Using C++ (3rd Edition)*.
- For novices who use *Programming: Principles and Practice Using C++ (2rd Edition)*.
- For novices who learn C++ by any other ways.

References

I learnt cmake mostly from *Modern CMake for C++*; my C++ learning map is listed in 学习大纲 (although the table of contents is in Chinese, almost all resources in it are in English).

What's more, this repository highly depends on aminya/project_options, which improves the CMake experience a lot.

For conan 2.0, the official documentation is helpful.

Details about this repository can be found in 对配置文件的解释.
